

James Kao

I'm a full stack hacker/engineer based in San Francisco. Previously worked at Snapcard, building and integrating APIs for cryptocurrencies. Currently disrupting the edTech scene with HackingEDU, the largest education hackathon.

Your Company | 2015

I'm looking for a team with passion for their product and an ambitious vision for the future.

HackingEDU | Web Dev | Jan 2015 - Current

Currently implementing and managing the website and technical operations for the event, coordinating with operations and design teams.

SNAPCARD, Inc. | Full Stack Dev Intern | June - Sept 2014

Responsible for the integration of third party services, developing designs, rapidly fix bugs and solving problems, and working closely with the development team to make product advancements to help grow the user base.

SweetHomes | Tech Lead | Sept - Dec 2014

Lead the technical implementation of a mock real estate website through the complete software engineering process. (SCRUM, teamwork/communication, working efficiently with people and their different skill levels, QA/Usability)

SFSU | Spring 2015 (expected)

B.S. Computer Science

Mirapath, Inc. | IT Support Tech | June - Sept 2008

Developed a PHP form to update shipping and receiving information. Initial exposure into web and WYSIWYG coding.
